

Mobil Textile Oil Medium Solves Oil Stain Problems on Products and Saves US\$ 10,000 Annually

Textile Machine
Soosan Precision Co., Ltd
Korea
Mobil customer since 1996

Objective

To eliminate oil stains problems and enhance the quality of products.

Soosan used mechanical oil in their textile machines, which led to oil stains on products, and hence reducing the quality of manufactured socks.

The mechanical parts that run at 350-400 rpm at high temperatures required adequate oil film thickness and good wear protection.

Solution

A 6-month field test was conducted with **Mobil Textile Oil Medium**.

Result

Mobil Textile Oil Medium eliminated the oil stains problem. It was able to provide similar wear protection as well as simplify textile oils for end-users.

Benefits

An annual savings of US\$ 10,000 is realised.
